origami

PEN-AND-PAPER METHOD ARE NO LONGER COMPETITIVE!

Convert all kinds of paper-based procedures into an optimized digital alternative.

Origami is a digital transformation solution enabling organizations to shift to. Paperless environment with no need for integrations or modifications to existing software regardless of its

Organizations spends intensively and expensively on scanning, microfilming, and archiving process. By adopting digital solution, time spent on unnecessary tasks will be significantly reduced and the need for physical storage space for paper records will also be minimized.

Statistics shows that

of paper printed in offices ends up trashed by the end of the day

of print jobs are never retrieved from printers, leaving sensitive data available to anyone who

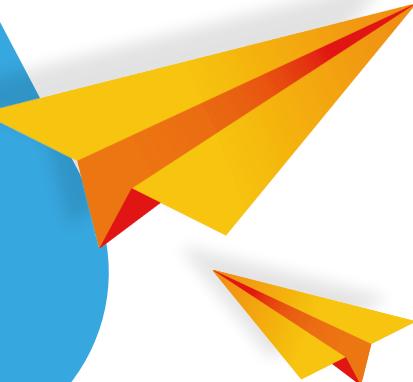

of businesses want to create more paperless workflows and processes to help reducing the virus spread

COST SAVINGS

- ◆ Eliminating or minimizing printing from your main business processes will heavily reduces costs.
- ◆ Time and space saving is huge cost saving!

75%
**REDUCTION OF
PRINTING COST**

INCREASED OPERATIONAL EFFICIENCY

- ◆ The process is made more easy, efficient, and time saving. Considering the elimination of time and effort consumed in paper handling, travel time, scanning, reviewing, signature...etc.
- ◆ DMS environment have the capability to improve collaboration both internally and externally using web digital tools and workflows
- ◆ Powering up organization reporting and analytics capabilities by being able to report, analyze the documents contents that were usually handled as a black box
- ◆ Switching to digital help reduce spreading a virus

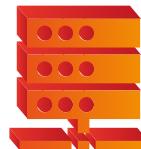

- ◆ The faster and smarter you work, the better the service you deliver to customers.
- ◆ Polish the organization with a unique prestigious modern touch elevating its market image to a higher standard

EFFICIENCY INCREASE

- ◆ Improve customer flow, reduce or even eliminate lines, and allow staff to focus on customer service.
- ◆ Supports operational excellence and reduces process timing by saving the paper handling lengthy duration like printing, scanning, sending to another user for reviews, verification, signature...etc

REAL TIME DATA

- ◆ With the power of real time data decisions are made at the speed of your business
- ◆ Experience proactive approach and improve operational processes
- ◆ Optimize business response and agility
- ◆ Rapid detection and addressing of Issues

REDUCE OPERATIONAL RISKS

- ◆ Reduce operational risks related to vouchers, contracts, or other paper loss improve customer flow, reduce or even eliminate lines, and allow staff to focus on customer service.
- ◆ Every piece of paper in an in-tray is a security breach waiting to happen - the same is true for unsecured filing cabinets. Maintaining documents digitally keeps them out of sight and ensures a clear trail of everyone who has accessed them.
- ◆ Password-protected digital files reduce the chance of records being accidentally released, hacked, or stolen. Unlike paper files, digital files that are backed-up are also not vulnerable to natural disasters.

SUSTAINABILITY

- ◆ Eliminate use of paper and save more trees
- ◆ Reduce CO2 emission
- ◆ Lower the usage of electricity
- ◆ Decrease the environmental footprint

FROM TREE**

Comprehensive Document Recognition and Handling

Automatically Capture Document and Read all the contents

Ability to read text/barcode and store it during the process

Ability to read any type of barcodes inside all document pages

Integration to any DMS system for better search and audit requirements

Ability to read data from any page using text search or regular expression match

Provides string functions which help to get the required value as expected

Electronic Signature Features

Capture signatures with handwritten biometrics, click-to-sign with process evidence, or use personal signing certificates

Define any number of needed signatures

Real-time biometric signature verification

Read and sign documents directly on the mobile device

Integrate with any digital signature and authentication authorities i.e PACI

Locate the required location to place the signature within the document.

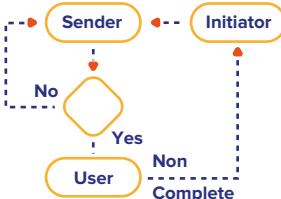

Streamline Process Workflow

Ability to return the process to initiator to complete it or modify it

Forward the process to another user to do additional tasks

Return the process to the sender in case there is any mistake or missing action need to be completed first.

3

Document Modification

4

Add Client Username Stamp to any page /all pages

Add Text Stamp to any page /all pages.

Add Client Machine Name Stamp any page /all pages

Add Datetime Stamp any page /all pages

Add Watermark any page /all pages

Add page header/footer to the document

Modify document bookmarks

Generate Barcode/QRcode to any page /all pages

Protect document with password

Digital sign the document

Database-agnostic**5**

Ability to read data from database,
all elements read from the
document can be used inside the
database query

Ability to push the document read
elements to database.

**Integration Friendly**

Ability to integrate to
REST API or SOAP
services using the
element read from the
document or from the
database.

Additional features
available for
authentication and
prepare the request
http header

Ability to read Json
data from the response
and keep it as element
to be used during the
process

Ability to read xml data
from the response and
keep it as element to
be used during the
process

Ability to read text
search/regular
expression match from
the response to
identify elements
which can be used
during the process

Smart Chip reading. i.e
CIVIL ID chips ...etc

6

Rich Image Capture Capabilities

Integrating with scanners to capture images

Image Files from explorer is supported

Border detection is available in order to reduce image size

Image Editing Capabilities

Ability to capture images from webcams

Documents Sharing & Archiving

Document can be protected by Password which will be delivered to the customer in another message

Share document by SMS, by publish the document and share the URL and OTP to the customer

Option to share the document hard copy with the customer by redirect the document to physical printer

Integrate with any DMS to archive the documents

Share document with the customer using Emails

Share document by Whatsapp, iMessage
